5a. Overall Approach to Risk Assessment

Policy Statement

At FDNM we promote the safety of children, parents, staff and visitors by reviewing and reducing any risks.

Risk Assessments

Risk assessments document the hazards/aspects of the environment that needs to be checked on a regular basis, who could be harmed, existing controls, the seriousness of the risk/injury, any further action needed to control the risk, who is responsible for what action, when/how often will the action be undertaken, and how this will be monitored/checked and by whom.

The nursery carries out a written Complete Nursery Risk Assessments regularly (at least twice annually). These are regularly reviewed and cover potential risks to children, staff and visitors at the nursery. When circumstances change in the nursery, e.g. a significant piece of equipment is introduced; we review our current risk assessment or conduct a new risk assessment dependent on the nature of this change.

All staff are trained in the risk assessment process to ensure understanding and compliance. Staff members working in the rooms conduct twice a day written risk assessments to cover and minimise daily hazards.

All outings away from the nursery are individually risk assessed and adequately staffed with paediatric first aid trained practitioners. For more details refer to the visits and outings policy.

This policy was adopted on 06/06/16
